UNIVERSITY OF BANJA LUKA
ПРИРОДНО-МАТЕМАТИЧКИ ФАКУЛТЕТ
FACULTY OF NATURAL SCIENCES AND MATHEMATICS

CHEMISTRY DEPARTMENT

FIRST CYCLE OF STUDY

Chemistry/Chemistry Education

Course name	Physics 1			
Course code	Course status	Semester	Hours of instruction	ECTS
1C16HOS318	required	I	3+3	6
Teacher(s)	Assistant Prof. Blanka Škipina PhD			

Prerequisite course(s)	Entry requirements
/	/

Course goals
The aim of this course is to provide basic knowledge in Physics, to encourage the students' interest in Physics, to develop a scientific-research approach, as well as to study the basic physical phenomena, concepts and laws necessary for successful mastering of other subjects as well as to develop certain creativity in engineering.

Learning outcomes
After successfully mastering of the module students will be able to: Explain the principles of Kinematics, Dynamics, Oscillation, Wave motion, Fluid Statics and Dynamics and Thermodynamic laws, explain physical phenomena and physical concepts in these fields, analyze and solve physical problems in the field of Physics 1.

Course content
Introduction in the Physics, SI Units and Prefixes, Kinematics, Dynamics of Material Point, Dynamics of Rigid Bodies; Oscillation, Wave motion, Fluids Statics and Dynamics; Temperature and Kinetic Theory, The Behavior of Real Fluids; Thermodynamic laws and Heat Transfer. <i>Experimental exercises:</i> Measurements and Error Analysis, Method of Least Square. Experimental verification of basic principles in the field of Physics 1.

Teaching methods
Lectures, computational and laboratory exercises

Books and other learning materials
J. P. Šetrajić, D. Lj. Mirjanić: Biofizičke osnove tehnike i medicine , Banja Luka 2012 Lj. Ristovski, N. Burić: Fizika , Belgrade 2002 W. Bauer, G.D. Westfall: University Physics with Modern Physics S. Pelemiš, Blanka Škipina, F. Ler, Zbirka zadataka iz fizike , University of Banjoj Luci, Banja Luka 2015

Course activities and grading method
The activity refers to the lab exercises, which are a condition for taking the final exam. Tests, two tests per semester. The first from the knowledge of kinematics and dynamics. Second test from the knowledge of oscillation, wave motion and thermodynamic. The results of the above tests are entered in the final grade only if they exceed 50% of the planned points for a given form of test during the semester.

Activity	8	Tests	32
		Final exam	60
